

Adware & Malware Apps

Good ones...

Worthless ones...

Adware Doctor

Bad one

Security risk....

**It is sold at the Apple App
Store**

Use at your own risk...\$9.99

Adware Removal Tool

Pretty worthless....
It is old and seldom
updated.

BitMedic Anti-Virus

Available at Apple App
store

***1 out of 3 purchasers say it is
worthless***

EtreCheck

Free .. Very High Rating

*Checks your hardware and
software*

<https://www.etrsoft.com/>

KnockKnock

Not an automatic program...

**You need to read the instructions on their
website**

**[https://objective-see.com/products/
knockknock.html](https://objective-see.com/products/knockknock.html)**

Ransomwhere

(Good one!!! Free.....same company as previous program)

<https://objective-see.com>

It watches for *File Encryption*

Why?...Ransomware encrypts your files and then asks for ransomware \$\$\$

(Ransomwhere runs in the background after you install it)

If you don't like it after you install it, it comes with an uninstaller

Malwarebytes Anti-Malware

***Probably the best there is...
and it is free!***

<https://www.malwarebytes.com/mac/>

ScamZapper

Free ...but for Safari only!

*Automatically watches for tech
support scams that pop up*

*[https://sites.google.com/site/
appleclubfhs/downloads](https://sites.google.com/site/appleclubfhs/downloads)*

LockRattler

Free.....Checks to see if your MacOS security is running and tells you what versions you have installed
(It comes with a .pdf instruction file but it is not complicated)

You need the next app to show you the latest versions Apple released

<https://eclecticlight.co/>

Critical Updates

*This shows you the versions of the latest Apple security software that should be on your Mac
(use it with Lock Rattler)*

Free at:

[*https://sqwarq.com/critical-updates/*](https://sqwarq.com/critical-updates/)
